ABSTRACT OF THE DISCLOSURE

2	Integrated	Circuit 1	Package	With	Overlapping	Bond	Fingers
~	militogration	Circuit.	I donago	4 4 1 571	Otoriapping	Dona	1117

- 3 An integrated circuit package comprises a set of bond fingers for connecting
- 4 wire bonds from the chip, the bond fingers being placed overlapping on a
- 5 transverse axis from the chip and extending inwardly and outwardly from
- 6 vias positioned at different positions along the transverse axis, so that wire
- bonds connected to adjacent fingers have the same length.
